

CHRISTOPHER B FERNANDES

Associate Architect | Full Stack & Data Engineering

Bengaluru, India • +91 77953 17335 • christyabcd.05@gmail.com

PROFESSIONAL SUMMARY

Associate Architect with 11+ years of experience building responsive, scalable, and high-performing web, mobile, and data platforms. Deep expertise across the Angular, Node.js, and JavaScript ecosystems, with proven success leading UI/UX-driven development for large-scale national government technology initiatives serving a userbase of 1.5 million+ and growing. Recently transitioned into data engineering, designing and optimizing high-throughput streaming data pipelines using Kafka, Flink, Druid, and PySpark. Skilled in modular architecture, microservices, and cloud-native deployment, and an early adopter of AI-assisted engineering — leveraging Claude and GitHub Copilot to accelerate daily development, automation, and documentation.

CORE SKILLS

- **Frontend:** Angular (v16+), TypeScript, JavaScript, Ionic, RxJS, Bootstrap, TailwindCSS, Material Design, HTML5, CSS3, ReactJS (basics), jQuery
- **Backend:** Node.js, Express.js, RESTful API design and development
- **Data Engineering:** Apache Kafka, Apache Flink, Apache Druid, PySpark, telemetry pipelines, stream processing, data pipeline optimization
- **Cloud & DevOps:** GCP (Cloud Run, IAM, App Engine), Docker, Kubernetes (basic exposure), Jenkins, caching strategies (Redis, in-memory)
- **Databases:** MongoDB, MySQL, Redis, Cassandra
- **AI-Assisted Engineering:** Claude and GitHub Copilot for daily development, code generation, automation, and technical documentation
- **Tools & Practices:** Git, SVN, Linux, NPM, Grunt, Umbraco CMS, Agile methodologies, code reviews, mentoring

PROFESSIONAL EXPERIENCE

Tarento Technologies Pvt. Ltd.

Bengaluru

Associate Architect (formerly Technology Lead)

Sept 2014 – Present

- Promoted from Technology Lead to Associate Architect, taking on broader ownership of architecture, technical direction, and cross-team engineering quality.
- Lead frontend architecture and full-stack integrations, ensuring cohesive performance between UI and backend services across large-scale platforms.
- Recently transitioned, out of strong personal interest, from the Angular UI team into the Data Engineering team — actively learning and applying Kafka, Flink, Druid, and PySpark while optimizing the existing production data pipeline.
- Direct hybrid mobile application initiatives from design through deployment, establishing reusable patterns and libraries.
- Mentor, train, and upskill new team members and interns, fostering a culture of continuous learning; contribute to technical hiring and interview evaluations.
- Spearheaded internal productivity tools (training management, time reporting) to streamline organisational processes.
- Integrated **AI-assisted workflows (Claude, GitHub Copilot)** into daily engineering to accelerate development, automate repetitive tasks, and generate technical documentation.

KEY PROJECTS

iGOT / Karmayogi Bharat — Associate Architect — Angular + Node.js / Data Engineering *Mar 2020 – Present*

National-scale government learning platform serving a userbase of 1.5 million+ and growing. Built on a modular Angular architecture with Node.js middleware, Dockerized microservices, and reusable libraries deployed on GCP. Led frontend architecture and build-time optimisation, and now contribute to the data engineering layer — optimizing high-throughput telemetry and streaming pipelines (Kafka, Flink, Druid, PySpark). The platform recently sustained 64 TPS, reflecting the high concurrency and usage demands of a nationwide deployment.

Ekstep – Sunbird — Software Developer — Hybrid Mobile App *Jan 2018 – Present*

Built Ionic-Angular hybrid applications for teachers and students featuring real-time content updates, RxJS integration, and API-driven content delivery. Also documented and contributed to optimization of the Sunbird telemetry data pipeline architecture.

MatchedIn — Frontend Developer *Jan 2018 – Present*

Developed the Angular 5 front-end with SASS and build optimisations; managed client communication and UI delivery directly.

HALO – PHMT — Frontend Developer *Sep 2017 – Jan 2018*

Built a patient survey module in Angular 4 with interactive canvas features and dynamic organisation onboarding.

Talx by Durex — Frontend Developer *Apr 2017 – Aug 2017*

Developed a responsive Umbraco CMS web app integrated with Salesforce chat for anonymous health consultations.

Viomba — Frontend Developer *Jul 2016 – Jan 2017*

Built a complete AngularJS frontend portal suite for analytics and ad-engagement tracking.

Earlier Projects — Actsec • Inbrix • Lithium • Kronos *2015 – 2016*

Delivered multi-tenant asset management dashboards, location-based survey dashboards, live fleet-tracking UI, and an internal time-tracking system — primarily in AngularJS with Google Maps API integration.

EDUCATION

Master of Computer Applications (MCA) — 76.51% *2014*

T. John Institute of Technology (VTU)

Bachelor of Computer Applications (BCA) — 77.57% *2011*

Basavaraddy Educational Society (KUD)

CERTIFICATIONS & LANGUAGES

- **Certifications:** Google AI Essentials; Microsoft Office Specialist (MOS); Microsoft Technology Associate (MTA); Harappa — Negotiating Wisely, Executing Solutions & Managing Teamwork
- **Languages:** English (Fluent), Konkani (Native), Kannada (Fluent), Hindi (Fluent)
